

SOFTCOVER WITH FRENCH FLAPS TEMPLATE EXPLAINED

The softcover with French flaps template is for a perfect bound book.

Just like the cover for a perfect bound book, but adds flaps that are scored and folded in. They are great for keeping one's place in the book.

Star Print Brokers will provide you with the measurements.

The softcover document set-up size should be:
 width = Overall Width
 height = Overall Height

If the cover bleeds, under document set-up, add 0.0125 inch (1/8 inch) bleeds on all sides. Extend image to bleed.

Use gridlines for layout measurements. Don't draw boxes unless it's part of the design.

When making the PDF, use all printer's marks including:

- crop marks
- registration marks
- color bars

Also check box to use document bleed settings.
